Overview

I am a human molecular geneticist with an expertise in forensic serology and DNA. I earned my B.S. in Biological Sciences at California State University, Sacramento in 1991 and M.S. and Ph.D. degrees in Genetics at UC Davis in 1994 and 1997, respectively. I have been a professor at California State University, Sacramento since 1998, where I developed and currently run an undergraduate education program in forensic biology.

I am the author of a forensic biology laboratory manual, *Murder and Molecules, a Laboratory Manual for Forensic Serology and DNA*, and created the Department's forensic biology curriculum, including a capstone experience that provides CSUS students with exceptional preparation for careers as criminalists. My laboratory, CSI-TRU (Crime Scene Investigations: Training and Research for Undergraduates), has helped dozens of students bridge the gap from college to careers in crime labs.

I have reviewed DNA discovery in more than 100 criminal and civil cases since 2000, providing an independent assessment of DNA discovery and serving as an educator for attorneys, judges, and juries. I have produced reports or testified in court in most of these cases and stay current in the technologies and chemistries utilized in the profession. I view consulting as an extension of my teaching: translating complex scientific ideas/concepts into clear, accessible language for non-experts.

I live and work in Sacramento, California but consult for attorneys throughout the United States and, occasionally, overseas. My primary focus is criminal defense and much of my work is with public defenders.

Experience and Qualifications

Education

- Ph.D., Genetics, University of California Davis, 1997.
- M.S., Genetics, University of California Davis, 1994.
- B.S., Biological Sciences, California State University Sacramento, 1991

Academic Appointments

- Professor, Department of Biological Sciences, CSUS: 2010-present
- Department Chair, Department of Biological Sciences, CSUS: 2014-2015
- Assistant Chair, Department of Biological Sciences, CSUS: 2006 and 2013
- Associate Professor, Department of Biological Sciences, CSUS: 2005-2010
- Assistant Professor, Department of Biological Sciences, CSUS: 1998-2005
- Assistant Adjunct Professor, Department of Environmental Toxicology, University of California, Davis, 2010-2013

Related Employment

- President, Ruth E. Ballard Ph.D., Inc. (Forensic DNA consulting); 2006-present
- Founder and Director, CSI-TRU (Crime Scene Investigation Training and Research for Undergraduates), CSUS: 2006-present
- DNA/Biology Adviser, Forensic Science Graduate Program, University of California, Davis: 2008-2013
- Founder and Director of FHIL (Forensic Human Identification Laboratory), UC Davis: 2008-2013
- Director of DNA-HIT, international research program in forensic biology, Tanzania and Kenya: 2002-2010

Teaching Experience (25 years)

- CSUS: Multiple courses at undergraduate and graduate levels in molecular biology, genetics, and applied forensic biology; mentorship of 100+ students in human genetics and forensic biology research
- UC Davis: Graduate-level laboratory course in applied forensic biology; mentorship of graduate students in forensic serology and DNA research projects
- California Department of Justice (CCI Program): Workshops in DNA extraction, human DNA identification, and capillary gel electrophoresis
- Workshops in DNA, third world allele frequency databases, and paternity testing for the California Association of Criminalists, the Sacramento County District Attorney's Laboratory of Forensic Services, and the Jan Bashinski DNA laboratory (Department of Justice)
- Author of laboratory course pack *Murder and Molecules: A Laboratory Manual for Forensic Serology and DNA*; CSUS)
- Coauthor of general genetics laboratory course pack (*BIO 184 Laboratory Manual*; CSUS)
- Developed Forensic Biology concentration at CSUS, including two major's courses in applied forensic biology: BIO 150 (Forensic Biology) and BIO 151 (Independent Laboratory Techniques in Forensic Biology)
- Number of former students working as criminalists: California State and Local Crime Laboratories: 45; graduate programs in forensic science: 11; Other science-related jobs: 150+ (estimated)
